

Bhagwati Interactive Smart Board  
Model no : BISB-070787

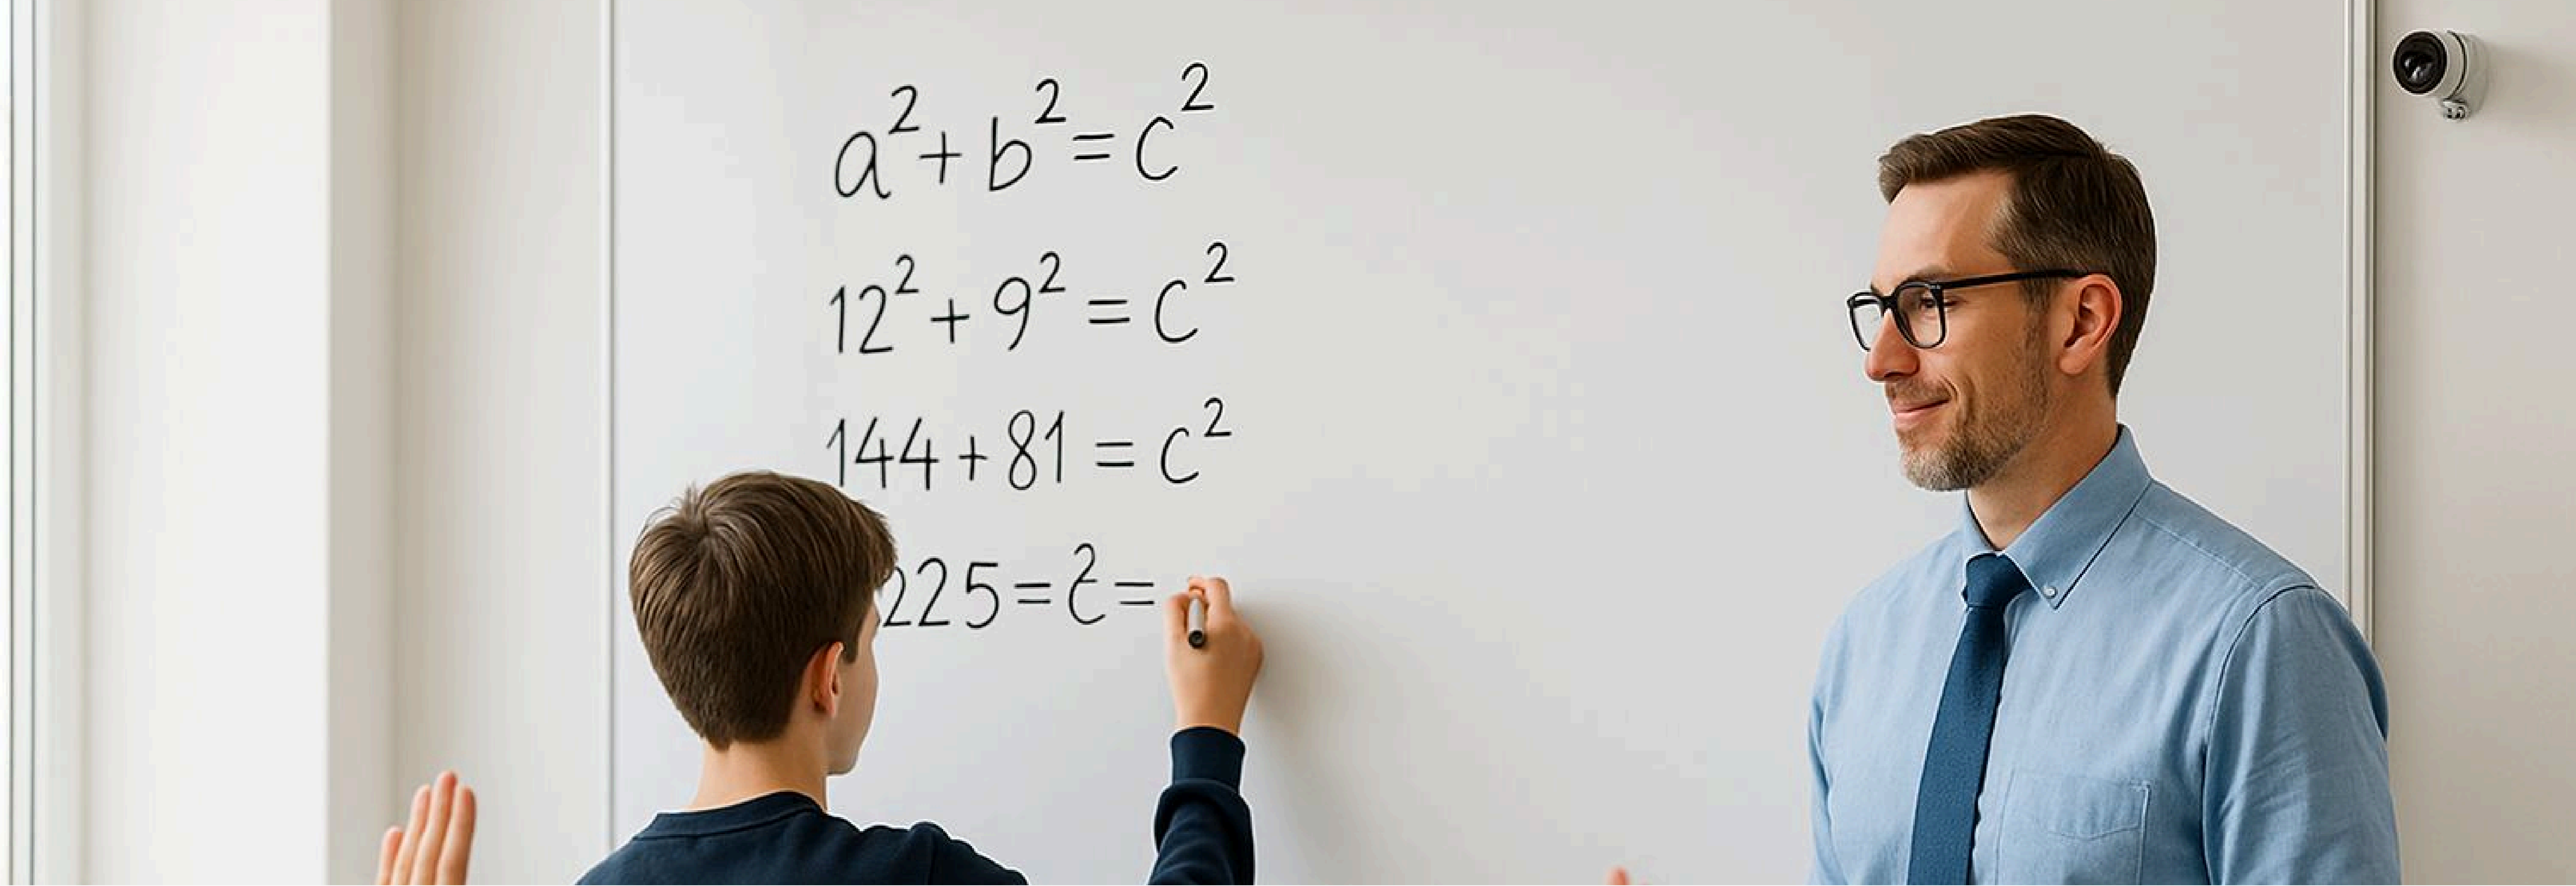

# Smart value that works for your classroom.

Feels familiar from  
the start just like the  
laptops teachers  
already use.

65" 4K zero-bonding interactive touch panel with built-in 48MP camera, 6-microphone array (10m range), and high-performance 8-core CPU, 8GB RAM, and 128GB flash storage

Versatile projection and connectivity options including HDMI, USB-C, Wi-Fi Direct, and wireless code-based mirroring with reverse control and BYOM support.

Feature-rich software with handwriting/shape recognition, multi-window multitasking, mobile screen mirroring, Android app support, and remote device management.

## SOFTWARE AND APPS

### Whiteboard

1. Writing latency: 30ms
2. Full-screen annotation: Allows taking a screenshot of any screen to enter annotation mode
3. Hand-drawn graphics are recognized as standard geometric figures
4. Handwritten text is recognized as standard printed text

### Openness

1. Supports android apps installation.

### Projection

1. Wired projection via HDMI cable; supports resolution up to 1080p at 60fps and 4K at 30fps
2. Wired projection via USB Type-C cable
3. Wireless projection by entering a projection code on a mobile phone or PC
4. Wi-Fi Direct projection: No need to configure a Wi-Fi router or change the network of the mobile phone or PC
5. Reverse control enables tap, drag, and double-tap actions on the large screen to control the computer desktop
6. Screen mirroring to mobile phones or tablets; allows users to operate camera, microphone, speaker, and return to the home page, enabling mobile teaching

### Special Feature

1. Multi-window: Desktop can be split into two windows displaying separate applications; window size can be adjusted by dragging
2. BYOM (Bring Your Own Meeting): Microphones, cameras, speakers, and touchscreens can function as peripherals for third-party conferencing on a PC using Type-C cables, a projection app, or a wireless dongle
3. Integrated remote management software of the same brand supports:
  - a) Batch OTA upgrade
  - b) Remote app management (install/delete)
  - c) Information window push
  - d) Device status statistics
  - e) Scheduled power on/off
4. Welcome page includes text and images; text is editable and images are customizable

## HARDWARE SPECIFICATIONS

### Size:

65" inch

### General:

#### The All-in-one terminal should include:

- o Interactive Panel
- o Built-in Speaker
- o Built-in Microphone
- o Built-in Camera

#### System configuration:

- o 8 core CPU
- o 8 GB RAM
- o 128 GB Flash

#### Wall-mounted bracket to be provided

### Touch Screen:

- o 65-inch D-LED touch screen
- o 4K60 resolution
- o Zero bonding
- o Optical anti-blue light protects eyes and maintains color accuracy (authentication certificate must be provided)

### Camera:

- o 1080P 30FPS built-in camera
- o Horizontal viewing angle: 120°
- o Vertical viewing angle: 90°
- o 48 MP

### Speaker:

In-built ISB

### Microphone:

- o 6 built-in microphone arrays
- o Sound pickup radius: 10 meters

### Interface:

- o Video In: 2 x HDMI 2.0
- o Video Out: 1 x HDMI 2.0
- o Audio In: 1 x 3.5mm
- o Audio Out: 1 x 3.5mm
- o USB Ports:
  - o 3 x USB Type-A 3.0
  - o 2 x USB Type-A 2.0
  - o 1 x USB Type-C (supports USB flash device, wireless dongle for projection)
